

Software Tester

AG is employing more than 50 000 people. In our Czech offices located in Prague City Center, we employ more than 300 employees from 35 different countries. We are successful in providing a wide range of quality IT solutions that we deliver to Commerzbank and we are expecting further growth by providing new services and projects to help creating the future of digitalization..

We are searching new Testers. Join us!

You will be responsible for:

- Testing especially web applications
- Running manual tests in HPQC
- Reviewing specifications and creating test cases
- Designing and running Selenium webDriver automated tests
- Writing bug reports in TFS
- Performance testing
- Regression testing
- Working with developers and project support teams
- Discussing with business analysts and business users to understand the specifications and requirements

We prefer candidates with:

- At least one year experience on similar position
- Advanced level of English (both written and spoken)
- Analytic skills
- Knowledge of SQL (preferably MS SQL)
- Experience with creation of test cases
- Experience with test automation (using some code/scripting language, preferably Selenium webDriver) or at least basic programming experience
- Experience with HPQC and TFS is a plus

We offer:

- Friendly multicultural environment
- Flexible working hours
- Modern offices in Prague City Center
- Relax corner where you can recharge your batteries
